

- sets
 - 1 implementation
 - 1.1 operator overloading
 - 1.2 hash tables
 - 1.2.1 VisiSet demo
 - 1.3 bit vector
 - 1.3.1 UIntSet
 - 2 examples
 - 2.1 motivating "tickets"
 - 3 API
 - 3.1 built-in classes
 - 3.1.1 frozenset (first!)
 - 3.1.2 set
 - 3.2 abstract classes
 - 3.3 DX analysis
 - 3.3.1 operators x methods
 - 3.3.2 minimal x convenience methods
 - 3.3.3 comparison to languages
 - 4 math
 - 4.1 logic
 - 4.1.1 De Morgan's laws
 - 4.2 notation
 - 4.2.1 similarity to comprehensions
 - 4.3 operations
 - 5 conclusion
 - 5.1 applied Python features
 - 5.1.1 set comprehension
 - 5.1.2 generator expression
 - 5.1.3 iterator protocol
 - 5.1.4 operator overloading
 - 5.2 sets, logic and databases
 - 5.3 sets in practice
 - 5.4 Pythonic API design
